MEMORANDUM

From: Chairman, Information Systems Executive Board, Naval Dental Center, Southwest  
To: Commanding Officer, Naval Dental Center Southwest

Subj: ISEB MEETING FOR 10 MARCH 2004

Encl: (1) Info Gathered 3/10/04 for NMCI Survey  
(2) Sample NMCI Survey input screen

1. The subject meeting was called to order at 1000 10 March 2004. The following members were in attendance:

CAPT Deuring	CAPT Vacek	Ms. DeMars	LT Cross
CAPT Bobroff	LCDR Bernard	LTJG Kraft	

2. Discussion focused on responding to Navy Marine Corps Intranet (NMCI) data call regarding current manning and number of NMCI seats (computers) required for a BUMED Business Case Analysis (BCA). Data submission will be by site UIC. Every DTF is a site. HQ will be combined with NAVSTA since both sites share the 66022 UIC.

3. Manning is to be recorded for four categories – military officer, military enlisted, GS civilian and contract civilians. The ISEB has the following recommendations.

- a. Military officer and enlisted manning will come from the Authorized Manning Document (AMD).
- b. Civilian (both GS and contract) manning values will come from the Civilian Program Manager. All civilian billets are filled at this time.

4. NMCI seats required will be determined from the following algorithms, which are greatly based on recent CHCSII site surveys performed by MHS. See attachments for column references.

- a. Number of PCs
  - i.

(PC in use now) (column 1)  
minus (PC is use now that is in recognized CHCSII location ) (column 2)

A = this delta is the administrative PC count not addressed by CHCSII

B = CHCS2 Replacements of existing PC (column3)

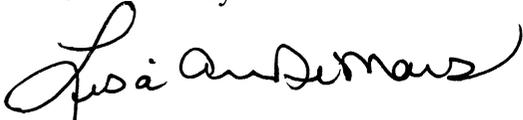

C = CHCS2 Additional anticipated PC (column 4)

D = number of NMCI PC required (column \*)

D = A + B + C (number to be reported on data call)

- ii. Three additional PCs will be added to MCRD to cover those current green-side assets which haven't been replaced by blue-side.
  - b. Number of laptops will equal the existing number of laptops, plus three more for the ADL departments to work in small places and connect to Lab Manager database.
  - c. All clinics will be surveyed by email regarding existing PDA devices.
  - d. Blackberry devices will be reported as the existing four plus two additional.
5. The meeting was adjourned at 1030.
